

## Studs and Nuts

RIMEX studs and nuts are manufactured to a consistent high quality. Each stud and nut is manufactured using a three-step manufacturing process including a rolled thread method, heat treatment and de-embrittlement process, thus providing good mechanical characteristics and allowing you to achieve and maintain proper wheel torque and payload.

RIMEX Stud and Nut catalogue contains detailed information on fasteners for earthmoving vehicles and is available online at [www.rimex.com](http://www.rimex.com).

## Valve Hardware

Designed to meet all industry changing performances, RIMEX offers a variety of valve components to meet all our customers needs. All valves are manufactured using the most advanced technology and with your safety in mind.
